

**Charter Schools Added to School Lists**

Many of you have been asking for the addition of charter schools to Matrix. The lists of elementary, middle, and high schools in Matrix have been updated to include many charter schools. Charter schools in each school district that are on the Colorado Department of Education's school list will now be available on listing input.

If you don't see a particular charter school, but it is listed on the Colorado Department of Education's [website](#), please send an email to [support@REcolorado.com](mailto:support@REcolorado.com) to let us know.

**Note:** Charter schools that are not associated with a particular district are not included in the lists.

**Additional Search Fields for New Construction**

The new fields that were added as part of the new construction project can now be found under the Additional Fields list on Residential, Land, and Cross Property searches.
