

New Mobile Responsive Search Design for REcolorado.com

The usage of mobile devices continues to increase, so we have updated the REcolorado.com detailed search to provide you with a better experience on mobile devices. You'll also now see photos on all search result display options, and a new mobile responsive design on the search form and results displays.

Basic and Detailed Search Options

The search form has been updated so the most commonly-used fields (location, price, beds, and baths) are always available at the top of your results. To view additional search options, click or tap the **More Options** button.

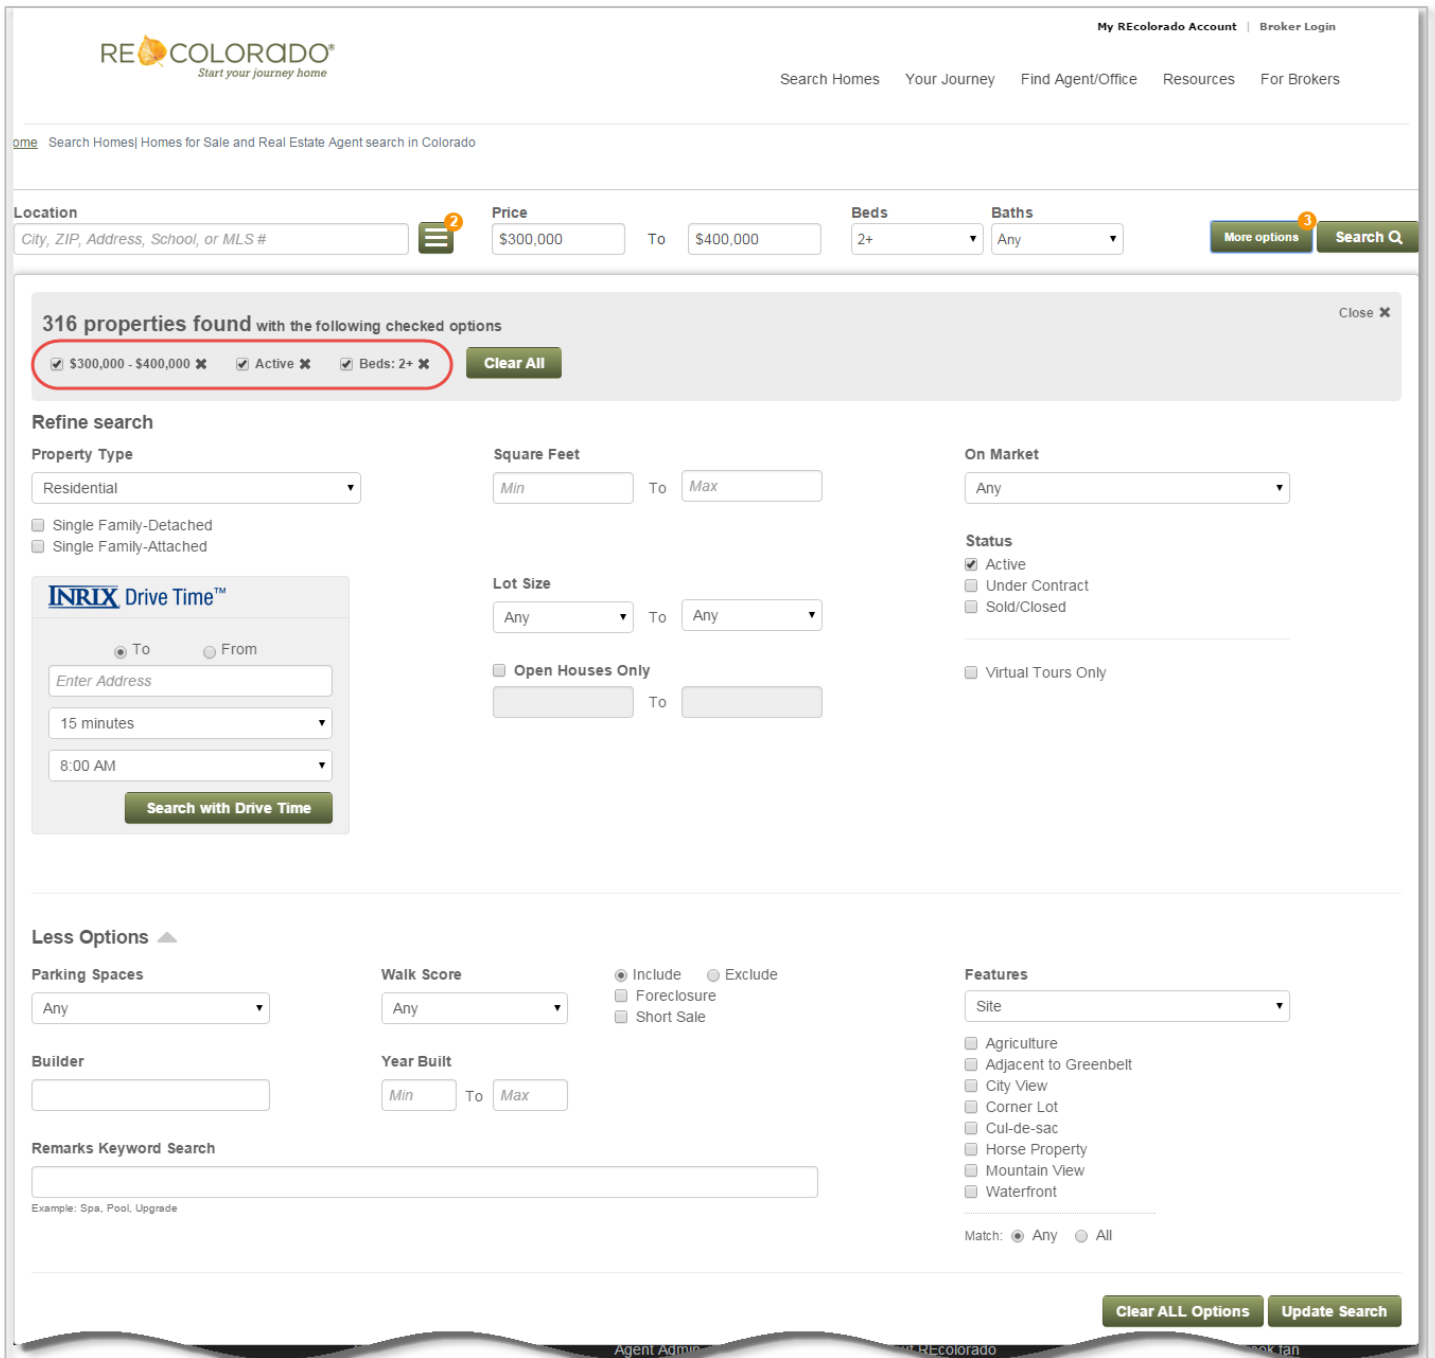

As you add or remove the detailed search criteria, the number of criteria you have selected will display on the **More Options** button.

New Search Form

All currently-available search options are available in the new search form, but the layout and design has been updated.

On search criteria, you now have the option of completely removing one of your criteria by clicking the **X**, or of simply deactivating it by clicking the **checkbox** next to the criteria. This makes it easier for you to see how many additional listings are included when a piece of criteria is removed from your search.

Search Results View Options

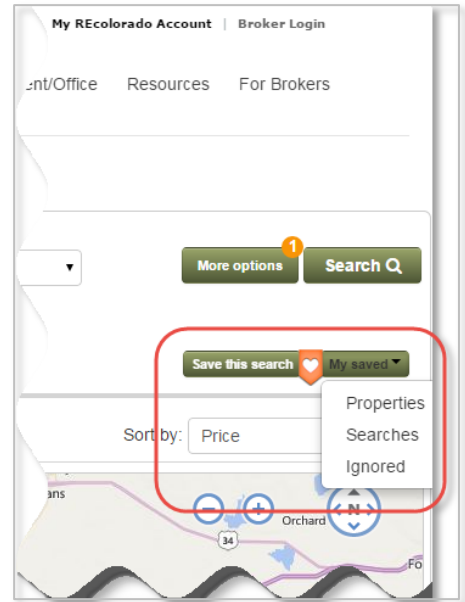

The search results display options now include **Map View**, which lists a summary of the listings next to a map, or **Photo View**, which displays a larger photo with summary information about the property. Clicking on a property from either view still takes you to the property details page.

The options available on search results have been simplified to **Email This Property** or **Save This Property**. From either the map or photo view, you'll now be able to clearly see that you've saved a property and easily remove it from your saved list.

The screenshot displays the REcolorado.com search results interface. At the top, the REcolorado logo is on the left, and navigation links for 'Search Homes', 'Your Journey', 'Find Agent/Office', 'Resources', and 'For Brokers' are on the right. Below the navigation is a search bar with a 'Location' field (placeholder: 'City, ZIP, Address, School, or MLS #'), 'Price' fields (Min, To, Max), 'Beds' and 'Baths' dropdowns, and buttons for 'More options', 'Search Q', 'Save this search', and 'My saved'. A red box highlights the 'Map view' and 'Photo view' buttons. Below the search bar, it indicates '200 of 8,987 properties displayed' and a 'Sort by: Price' dropdown. The main content area shows four property listings. The second listing, '451 Three Meadows Lane Evergreen, CO 80439', is highlighted with a red box around its 'Save This Property' icon (a heart with a checkmark). Each listing includes a photo, price, address, and 'View Details' button. The bottom of the page shows a row of four smaller property photos.

Additional Search Improvements

In addition to the **Save this search** option, the new **My Saved** dropdown gives you easier access to your list of saved properties, searches, and ignored properties directly from the search results.

Sort by options have been simplified to Price, Date Listed, City, Street Address, Beds, and Baths. Click the arrow next to your sort option to change between ascending and descending.
