

New “SqFt Other Finished Description” Field

Based on customer feedback, a new field has been added to allow you to describe what type of structure the other finished square feet is in, such as a Carriage House or Mother-in-Law apartment. This field is available on Residential Detached and Residential Attached input in Matrix, as well as the PDF input forms available on REcolorado.com.

This field is also available as an addable search field, and has been added to the Full displays, the Full, Presentation, and Appraiser export templates, and can be added to custom single line displays and exports.

History Rollout Added to Full Display

To make it easier to print a report that includes complete property information and the complete listing history for that property, a history “rollout” has been added to the Full Display for all property types.

At the bottom of the Full displays, you can click the arrow to display or hide the history for that property.
